Professional Summary

Computer Science graduate with hands-on experience building full-stack applications using React.js, Node.js, Express.js, MongoDB, PostgreSQL, and REST APIs. Experienced in developing backend APIs, database schemas, authentication workflows, and responsive frontend interfaces. Strong problem-solving and debugging skills with practical experience using Git, GitHub, Postman, and Docker. Passionate about building scalable consumer-facing products and exploring AI-powered applications.

EDUCATION

Bachelor of Engineering in Computer Science 2022 – 2026

SIR M. Visvesvaraya Institute of Technology, Bengaluru

Cumulative GPA: 8.66 / 10.0

Class XII, Masters PU College 2022

Percentage: 97%

Class X, MDRS Bargur 2020

GPA: 98.4 / 100

TECHNICAL SKILLS

Programming Languages:	JavaScript, Java
Frontend:	React.js, HTML5, CSS3, Bootstrap, Tailwind CSS, Redux
Backend:	Node.js, Express.js, REST APIs, JWT Authentication
Databases:	MongoDB, PostgreSQL, MySQL, SQL, Database Design
Tools:	Git, GitHub, Postman, Docker, Vercel, Cloudinary
Development:	API Validation, Error Handling, Authentication, Role-Based Access Control, Debugging, Deployment

WORK EXPERIENCE

MERN Stack Intern — Dhee Coding Labs (DCL) March 2026 – Present

- Developed full-stack applications using React.js, Node.js, Express.js, and MongoDB with RESTful APIs, authentication, validation, and error handling.
- Troubleshoot application and API issues, worked with database integration, and practiced deployment and debugging of web applications.
- Built responsive React interfaces and integrated frontend components with backend services to deliver reliable application workflows.

PROJECTS

HackaBye (Event Platform) Live

- Built and deployed a full-stack event platform featuring authentication, event registration, payment processing, and user management using Next.js, Node.js, and PostgreSQL.
- Developed RESTful APIs with validation, structured error handling, and transaction-based workflows for reliable registration and payment operations.
- Designed optimized PostgreSQL schemas and queries and deployed the application on Vercel, troubleshooting API, database, and deployment issues.

E-Commerce Platform

- Developed a full-stack e-commerce platform featuring JWT authentication, role-based access, product management, cart and order management, and Redux-based state management.
- Built REST APIs with Node.js, Express.js, and MongoDB, implementing validation, error handling, and structured database schemas for users, products, carts, and orders.
- Integrated Razorpay payments, Cloudinary image storage, and Docker containerization, with deployment and environment configuration.

Sisuni Tech Website

GitHub

- Built a full-stack corporate website with React.js frontend and Node.js/Express.js REST APIs for job management and applications.
- Implemented JWT authentication, API validation, error handling, and MongoDB integration for reliable data management.
- Troubleshoot backend, API, and deployment issues while maintaining application functionality.

EXTRACURRICULAR

- **Volunteer, Agentic AI Hackathon 2025 by Google:** Contributed to event logistics and coordination for Asia's largest hackathon (2000+ participants), achieving a Guinness World Record.
- **Volunteer, Gen AI exchange Hackathon 2025 by Google** Hosted one of the professional track.
- **Project Exhibition – Innovista:** Awarded 2nd Runner-Up in the intra-college exhibition for presenting an innovative and practical project solution.
